RESUMEN

Systems and computer technician 21-year-old, i'm currently in my ninth semester studying systems engineering. I work as a software developer focused on the web, I am characterised by being very ambitious and disciplined in the projects I participate in, I am involved in developing software of the best possible quality, functional, scalable, practical and robust, I have skills mainly backend developer but also complement with front-end skills, always with the ability to learn and adapt to customer requirements.
